step by step guide to Sync Nginx access log & error log data with Fluentd to MongoDB and visualizing it with MongoDB PHP GUI in debian bullseye

Share Prompt

Sure, here's a step-by-step guide to Sync Nginx access log & error log data with Fluentd to MongoDB and visualizing it with MongoDB PHP GUI in Debian Bullseye:

Step 1: Install necessary components

First, you need to install the necessary components for Fluentd, MongoDB, and PHP GUI. You can do this by running the following commands:

sql

Copy code

```
sudo apt-get update
sudo apt-get install -y curl gnupg2 apt-transport-https
```

Step 2: Install MongoDB

Next, you need to install MongoDB. You can do this by following the
